

# COLOCATION

## (Co)Location, (co)location, (co)location

We understand that the value of your business is built around your data. And where you put that data...well, it's all about location, location, location. Our security measures include multiple alarm systems, DDOS protection, encryption in transit and at rest, 2 factor biometric authentication and 24/7/365 surveillance to protect your most valuable asset. Otava colocation is specifically geared towards supporting and protecting your mission-critical applications with multiple power sources, diverse fiber paths and top-tier connectivity providers.

### ➤ Designed for dependability

You need colocation on a global scale? Say no more. Our 12 worldwide locations are at your fingertips. Strategically placed to provide perfect geological diversity, our expert staff is dedicated to proactively identifying and remediating issues to minimize risk. We know your business depends on your data, and that's why we work harder than anyone else to ensure its integrity, privacy and availability.

The level of service across the board from OTAVA has been nothing short of exceptional.

Brian Allen  
CEO | Progressive Data Services

### ➤ Available in racks, cages, suites

Whether you need just a single rack or your own private suite, we've got the solution for you and the VIP treatment to go with it. With our dedication to supporting mission-critical applications, you can trust your data will be available 24x7 in HIPAA, PCI, SSAE 16, SOC 2 and 3 audited data centers.

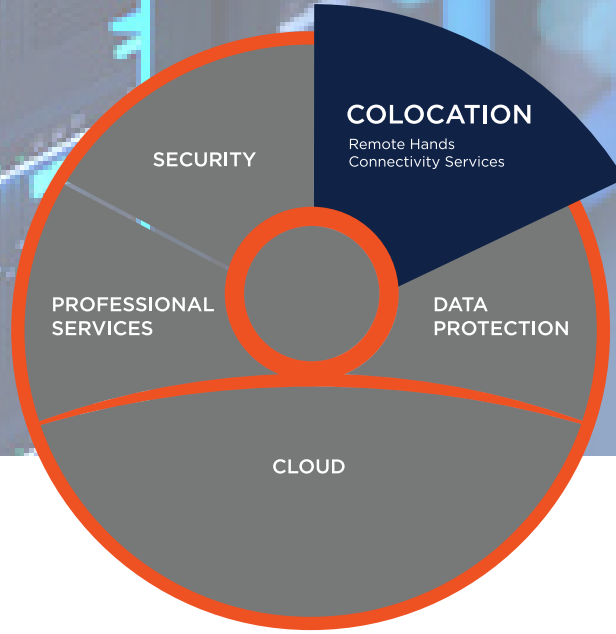

### ➤ Remote hands at your fingertips

Moving is a hassle. Moving into a data center is a hassle times 10. Why not make it as simple and painless as possible? Our remote hands are your long-distance guides to configuring, mounting, wiring and deploying your rack. Need someone to make a quick change to your server, or even build you an entirely new one? Call us and we'll get it done.
