OTAVA
MANAGED AZURE

Turn ideas into solutions faster with personalized Azure Cloud

Otava Managed Azure is your gateway to all of the possibilities cloud technology has to offer. Our ever-expanding set of services enables you to build, deploy, and manage applications – in the cloud, on-premise, and at the edge – using the tools and frameworks of your choice. Otava will manage and maintain your infrastructure, which means no big investment in personnel and hardware for you. Pair that with our world-class support team, available 24x7x365, and you're ready to unbox all the potential that Azure Cloud has to offer.

What makes Otava Managed Azure different?

- Leverage all of the benefits of a hyperscaler, while enjoying the expert advice and support offered by Otava.
- Otava can place your workloads in the cloud that works best for your business - be it public, private, or hybrid.
- World-Class support, available 24x7x365, with executive level escalation paths.
- Transparent Statement of Work (SOW) and product architecture, with solutions deployed by a dedicated project management team.

Otava Managed Azure Benefits:

> Cost Management
Predictive costs and valuable insights for cost management provide visibility to current spend, and forecasting capabilities help power strategic decisions.

> Regulatory Compliance
A comprehensive cloud structure built with compliance and security standards top-of-mind.

> Support
Real, human support from Otava's world-class experts available anytime you need it.

> Scalability
Easily and cost-effectively scale up and down to respond to the fluctuations of market demand. Grow your cloud environment as your business grows.

> Agile App Delivery
Quickly develop, deploy, and manage your enterprise, mobile, web, and IoT apps anywhere with your choice of tools, language, or framework. With more than 100 end-to-end services, you can deliver apps and services faster and reduce your time to market.

> Availability
You'll have increased security and privacy with data protection through Azure Backup and Disaster Recovery, as well as access to more comprehensive compliance coverage ensuring the safety and privacy of your apps and data.

TAKE YOUR WORKLOADS TO THE CLOUD

What's Included with Otava Managed Azure?

❯ Migration
Otava simplifies your migration of workloads into Azure. Our experts can assess and suggest how to best facilitate migration to help determine the economics of running your workloads in the cloud. Our no-frills approach will leave no question you have unanswered as we customize your seamless migration to the cloud.

❯ Configuration
We'll work hand-in-hand with you to configure an environment that fits your business objectives. No matter what those are, our cloud architects will create a platform that empowers you to not only meet, but exceed them.

❯ Governance
Maintaining control of your workloads in the cloud is essential to meeting your SLA's. Otava will advise and build the proper mechanisms to maintain control and compliance over your cloud infrastructure to achieve consistency, continuity, and availability of your workloads.

❯ Security
Security of your workloads is essential to maximizing their availability. Otava can provide proactive and reactive measures of defense from malicious activity across the attack surface of your applications. We help you thwart future cybercrime by providing visibility and guidelines on new, emerging threats. Otava can also advise and administrate a stringent security methodology to achieve regulatory compliances.

❯ Protection
Business continuity in the form of data protection and recovery is crucial to meet availability goals. Otava can manage and maintain these solutions to achieve recovery of sensitive data and applications according to your objectives.

❯ Monitoring
Understanding how resources are performing is vital to the continuous operation process. Otava will monitor your resources and provide first responder actions to ensure your workloads are available and performing to expectations.
